SecureLAN

Fully-Managed

As one of Australia's largest Managed Security Service Providers, Seccom Global offers cost effective powerful security solutions that replace or integrate with existing technologies. As security specialists and experts in our field, large multi-national and small to medium size enterprises trust Seccom Global to install and manage their IT security infrastructure. Choosing Seccom Global provides your organisation the expertise, infrastructure, knowledge and systems to allow you to focus on your Core Business. Having a fully managed security solution reduces business risk and your total cost of IT ownership.

Expert Advice and Support

Seccom boasts some of the most experienced security engineers in the country. As a specialist organisation, our security engineers are adept at integrating technologies and completing international rollouts of new security infrastructure. Our team provides advice and support on vulnerability testing, solution design, security policies and control procedures. With unsurpassed 24x7 technical support, **SecureLAN** is a smart solution for businesses of all sizes.

Reporting and Monitoring

SecureLAN offers full reporting to meet the needs of our customers. With large multi-national's already using **SecureLAN** to protect their networks, Seccom Global has created reporting infrastructure to provide valuable information to an organisation's IT specialists and executives.

Scaleable

Seccom **SecureLAN** comes with upgrade protection meaning that if your business grows and you need to upgrade a security appliance you only pay a monthly fee instead of the entire price of a new device. Ask us about our upgrade services.

Low Cost

SecureLAN reduces your IT security costs. You have the choice of purchasing equipment or enjoying Seccom monthly plans which require little or no capital investment. Find out how inexpensive managed security can be and enjoy SSL VPN support at no extra cost!

SecureLAN Protects your business assets

Threats that propagate throughout the Internet can change rapidly. They look for new system vulnerabilities to target, which potentially can lead to the destruction of your data and systems. SecureLAN uses industry leading technologies that automatically provide virus updates to each firewall. SecureLAN also uses an arsenal of integrated application security engines, which quickly identify and block today's blended attacks from infecting the network. SecureLAN offers:

- Stateful Inspection Firewalls
- Intrusion prevention systems
- Content Filtering Applications
- Spam and Virus Email Protection
- Adware and Spyware Protection Software
- Corporate Gateway Antivirus
- Instant messaging control
- VPN support
- 24x7 technical support and monitoring
- Granular reporting
- Remote SSL VPN
- Traffic & Protocol Management
- Bandwidth compression
