

SecureMAIL

Take back control of your email

Approximately 97% of all email received is Spam. Spam is a delivery mechanism for Viruses, Trojans, Inappropriate Content and Phishing Attacks. These all present potential risks to your business, not mentioning the congestion this traffic creates on your Internet link and at your mail server. Receiving such vast amounts of unsolicited mail also potentially affects business productivity.

SecureMAIL is a low cost, powerful in the cloud Anti-Spam solution that eliminates spam before it arrives at your Internet links. **SecureMAIL** will give you an affordable enterprise level Spam solution.

SecureMAIL

What is SecureMAIL

SecureMAIL offers companies all the security of the PROTECTION PLUS profile, along with the ability for individual users to manage their own Junk Mail, ensuring important communications are never lost.

SecureMAIL is a purposely designed solution that reduces the load and risk on a company email server by eliminating unsolicited mail prior to it getting to the company network. SecureMAIL also helps eliminate the risk of your company network being compromised through techniques such as tunneling.

What are the Benefits?

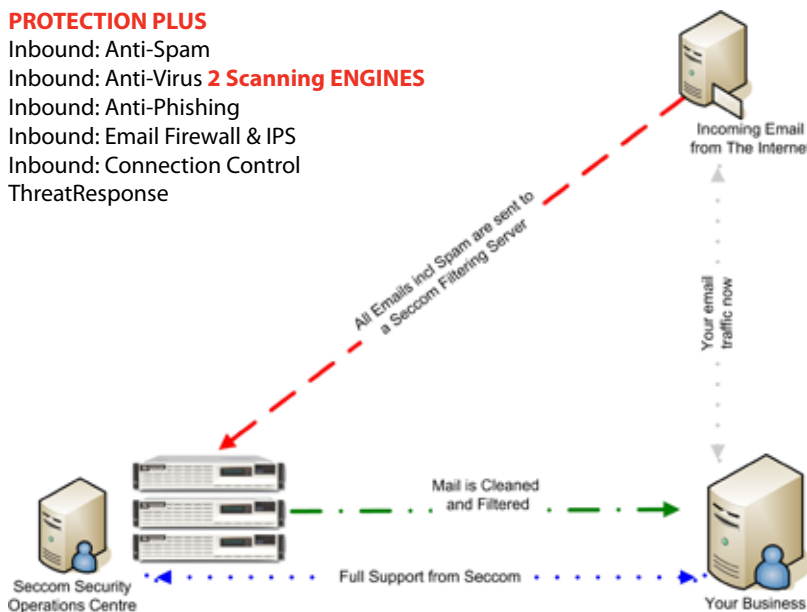

Without having to configure any on site appliances, manage firmware upgrades or security updates, SecureMAIL is simple to implement and easy to maintain. To get SecureMAIL started it can be as easy as a seamless redirection of the company's MX records and a simple policy configuration on your firewall.

Should your internal mail server fail or go offline for maintenance, SecureMAIL can act as a backup mail queue for up to 72hrs ensuring that you never again lose email.

Why deal with Spam when SecureMAIL will do it for you?
