

SecureWAN

Security, Speed and Reliability

Wouldn't it be great if your ISP actually worked with you to protect your network from Internet based threats? At Seccom Global we think that an ISP shouldn't send you Viruses, Trojans and Spam as well as billing you for the traffic or bandwidth they consume. With **SecureWAN** your traffic is filtered for 100% of known Viruses, Trojans and Malware delivering you true clean bandwidth. Leveraging from Seccom Global security capabilities, **SecureWAN** uses specialised security devices located within our POPs to eliminate the threat prior to it getting to your network. **SecureWAN** has been designed and built on Tier1 reliability without the acquisition or ownership costs usually associated with this level of quality.

SecureWAN

High Connectivity Speed

Seccom **SecureWAN** is available in speeds up to and over 1GBps. Using the backbone of major wholesale suppliers, Seccom **SecureWAN** can be delivered across various fixed tail technologies including Leased Line, ATM, Ethernet, E1, wireless and xDSL (inc. SHDSL and ADSL and ADSL2+). In addition, the traditional remote access solutions including permanent and dial-on-demand ISDN and Dial-up are ready to complement daily operating requirements.

Fully-featured Connectivity

SecureWAN offers a range of powerful options that include inbound and outbound virus scanning, intrusion prevention, remote device (router) monitoring including SNMP device statistics, trending, availability, outage response and escalation. It also offers comprehensive reporting options including Automated virus alerts, Telecommunication bandwidth utilization and availability reports. Combined with fully redundant, load -balanced Firewalls, **SecureWAN** is a premium product available at an realistic price.

Redundancy and reliability

Losing an Internet connection can be damaging. **SecureWAN** offers low cost redundancy through our multi-carrier relationships. **SecureWAN** features automatic failover to a different carrier meaning you have near zero network outages. Using only best of breed telecommunication suppliers means you have excellent reliability backed by strong SLAs.

Limited or no switching costs

Moving over to a secure connection can be less painful than you think. **SecureWAN** has relationships with many Tier 1 suppliers and in most cases can assist with some of the switching costs. You don't need to stay with an inferior Internet connection, we can help migrate you to the powerful **SecureWAN** product before the end of your contract.

Low Cost

You will be surprised at how much it costs to get a secure Internet connection. If performance, reliability and strong support at an affordable price is what you are looking for why not contact us today.

Providing high-speed clean bandwidth

Designed to provide redundant, secure and managed Internet connections, **SecureWAN** offers Tier 1 reliability without the Tier 1 cost! Using the backbone of major wholesale Internet service providers, Seccom uses its scale to offer a fully managed secure Internet connection. Leveraging from its security capabilities, Seccom uses specialised firewall devices located at our Secure POPs to mitigate threats before they get to your network. Your equipment is configured to work with the **SecureWAN** connection to offer unprecedented security while delivering superior speed and bandwidth quality. **SecureWAN** from Seccom Global offers:

- Redundant upstream wholesale providers
- Failover firewall protection
- 24x7x365 managed intrusion prevention monitoring
- Inbound and outbound virus scanning
- Guaranteed uptime
- 24 x 7 Help Desk support
- Predictable, flat rate pricing
- Flexible, scalable-on-demand usage
- Monthly comprehensive reporting
