

SECCOM GLOBAL MANAGED SERVICES

SecureINTEL

Security Information Event Management (SIEM)

For a **SIEM implementation** to be successful, it needs real time detection and response. A managed **SIEM solution** provides this with analysts **monitoring your events 24 x 7.**

Visibility is crucial to understanding what is happening in your network. How do you protect what you cannot see?

Without the crucial element of visibility, it is almost impossible to make the right strategic decisions. Security breaches, on average, take almost eight months to detect and are more often discovered by third-parties. If you cannot see, in real time, what's happening in your network & cannot remediate immediately, how can you protect your information?

Event Sources

Collect information from
200-300 sources

Millions of events

Sort through the millions of
events each day

Incidents 200+ per day

Decide what is noise &
what are real problems

Alerts two to four

Our analysts will review &
advise on the real problems

“ **SecureINTEL - SIEM**
finding and solving
issues every day. ”

The **Seccom Global Security** Operations
Centre is working **24 x 7, to monitor,
detect and respond** to every security
breach.

With **SecureINTEL – SIEM** we give you
both the **technical expertise and
innovative systems**, to provide the
critical information required to make
informed security decisions.
