

SECCOM GLOBAL MANAGED SERVICES

SecureINTEL

Endpoint Detection & Response Service (EDR)

95% of breaches occur at the endpoint!

The endpoints on your network provide a highly vulnerable attack surface to target. Because they vary extensively in configuration they tend to be difficult to protect - this makes them highly susceptible.

As **malware, exploits** and **live attacks** become more and more **sophisticated, legacy Antivirus solutions** may be less effective, potentially **leaving your organisation at risk. SecureINTEL** is built on **new leading-edge detection technologies** which can identify abnormal behaviour characteristics & **utilising Artificial Intelligence**, are discovering the threats that have previously been invisible to traditional discovery practices.

Patch Vulnerabilities

Establish mature vulnerability and patch management processes

Analyse Events

Focus on post-event analysis and response capabilities

Managed EDR

Deploy managed EDR as an active Detection and Response Platform

“ **SecureINTEL** is built on new leading-edge detection technologies which can identify abnormal behaviour characteristics & utilising Artificial Intelligence. ”

The **SecureINTEL - EDR** service is designed to both simplify and relieve the stress of managing security on the endpoint. It gives you a highly effective protection solution as it is monitored and maintained proactively, meaning threats are identified much faster. Our team of Security Analysts review in real time the information we receive and work with you to ensure your network remains secure.
