

SECCOM GLOBAL MANAGED SERVICES

SecureLAN

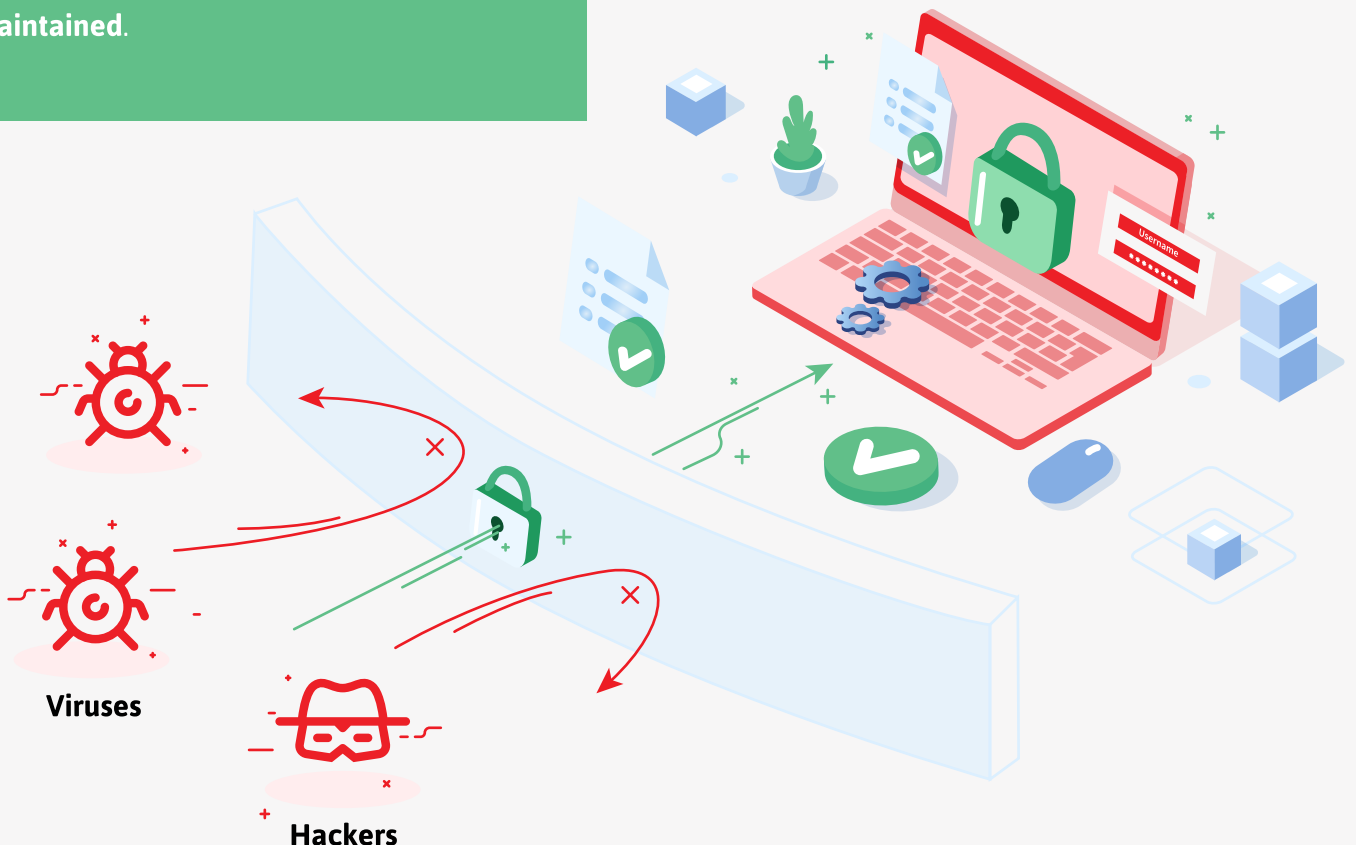

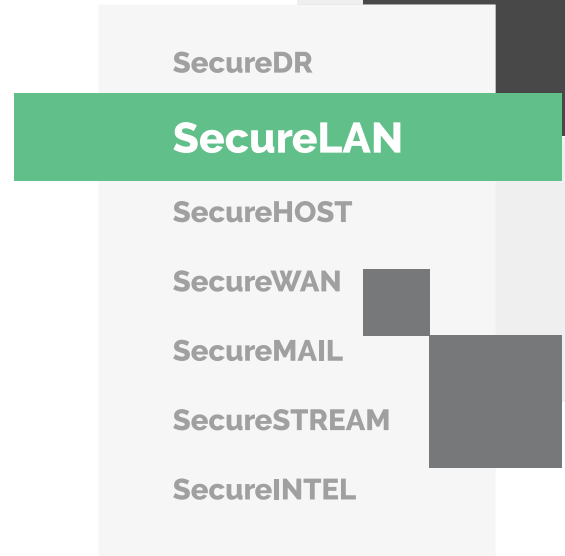

Taking the pain out of a complex problem

We designed **SecureLAN** to provide you with the specialist skills and resources that are needed to effectively manage and maintain your edge security architecture.

An integral part of this architecture is the firewall. The **effectiveness of any firewall** is a direct result of how proactively that firewall has been **managed and maintained**.

With **SecureLAN** you receive **best of breed technology** and access to our **purpose-built monitoring, management and reporting systems**.

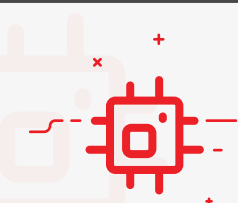

These systems are hosted in our **state-of-the-art, 24 x 7 Data Centres**, managed by our **highly certified security engineers**.

24 x 7 Support

Seccom Global's Security Operations Centre & support staff

Best Technology

Best of Breed Technology & providing access to all our supporting systems

Reliable

Managed by our highly certified security engineers

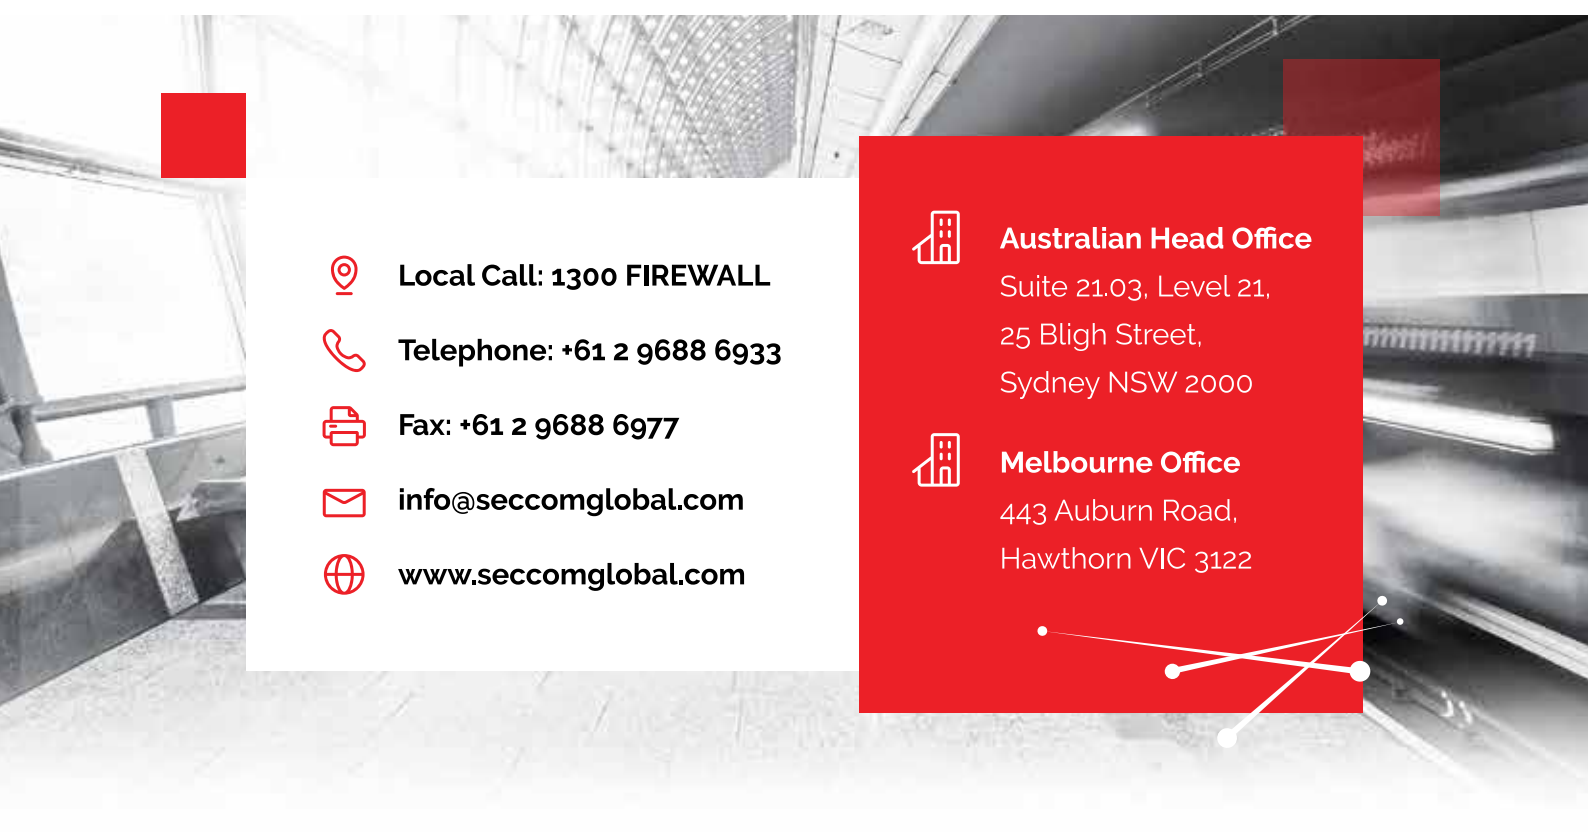

Affordable

We give you predictable, known monthly pricing

“ Why would you risk handing the management of your **critical security systems** to a generalist IT engineer? ”

As a leading Cyber Security company, we have developed exceptional expertise and experience in providing proactively managed firewall solutions. The purpose of **SecureLAN** is to relieve you of the burden of **firewall configuration & management** allowing you more time to concentrate on building your business.
